Boise, ID 83709

Monday, April 14, 2014

Dear Scott Stopak,

Your application has been received and was accepted by the Agency on 4/14/2014. Pursuant to 40 CFR 171.11 and EPA's certification plan for applicators of restricted use pesticides (RUPs) in Indian country, you are now federally certified to apply RUPs only in areas of Indian country that are contiguous to ID, subject to the same restrictions and limitations of that state certification.

EPA's approval of your application and issuance of the federal certificate is based on your current certification status in the state of ID (known as your underlying certificate). Accordingly, it is your responsibility to maintain your federal certification to apply RUPs in Indian country located contiguous to the state of ID. You also must maintain the ID certification on which this federal certification is based. Should the state revoke, suspend, or modify your state-issued certificate, you must notify the EPA. The EPA may also revoke, suspend, or modify a certificate pursuant to 40 CFR 171.11(f). The EPA encourages you to carry both your federal and underlying certificates when purchasing or applying RUPs. Should your underlying certificate be revoked, suspended, or modified, keep a copy with your federal certificate until EPA completes a review of your federal certificate.

You are federally certified for the same categories as for your underlying state certificate. Your federal certification expires when your ID certificate expires on 12/31/2014. To seek recertification, you will need to resubmit a complete application form, including a copy of your current and valid underlying certificate, to the Agency.

This plan, and your federal certification, are valid in those areas of Indian country where no EPA-approved or EPA-implemented plan exists. As a federally certified applicator applying RUPs in Indian country, all of your pesticide applications are subject to the requirements of the Federal Insecticide, Fungicide, and Rodenticide Act and its implementing regulations. In addition, you are required to comply with all the reporting and recordkeeping requirements that apply to certified commercial applicators; see 40 CFR 171.11(c)(7). You should check with the tribal authority where you intend to apply RUPs to see if additional tribal requirements and restrictions apply. You are responsible for complying with applicable tribal laws and policies.

Please call (206) 553-1495 if you have any questions regarding your federal pesticide certification.

Sincerely,

Kelly McFadden
Manager, Pesticides and Toxics Unit
